

Superstore Sales Analysis

Data Visualization & Storytelling (Task 2)

Prepared by: Faisal Akbar

Key KPIs

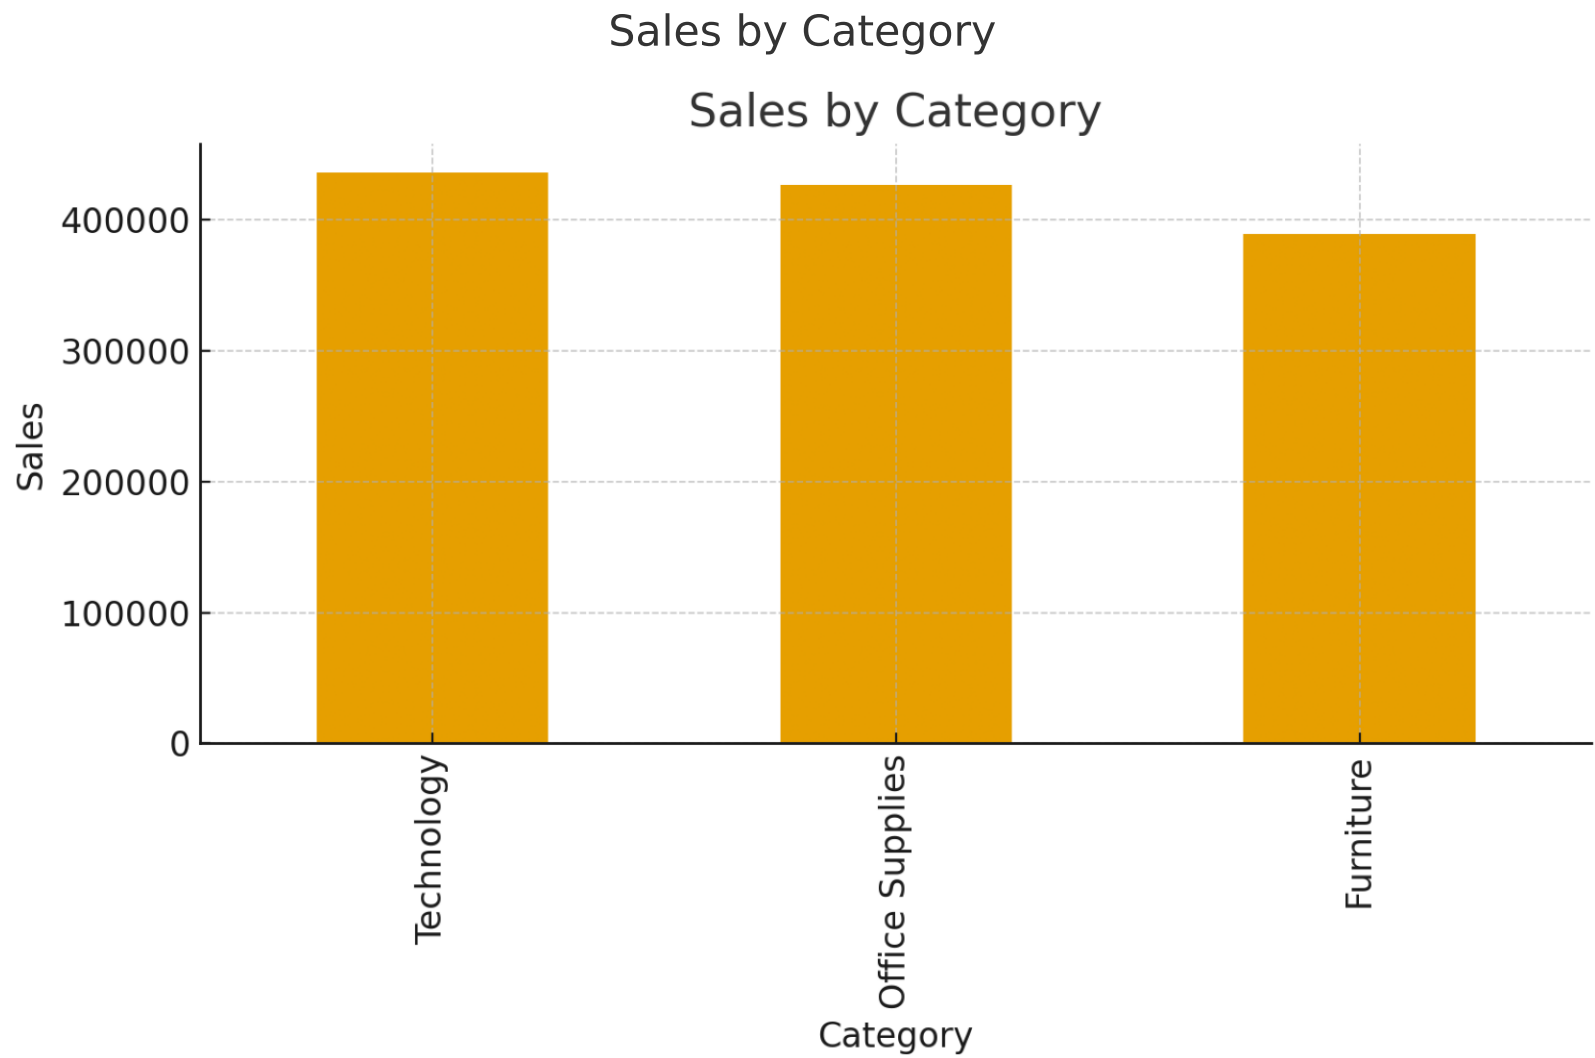

Total Sales: 1251938.5

Total Profit: 123507.8

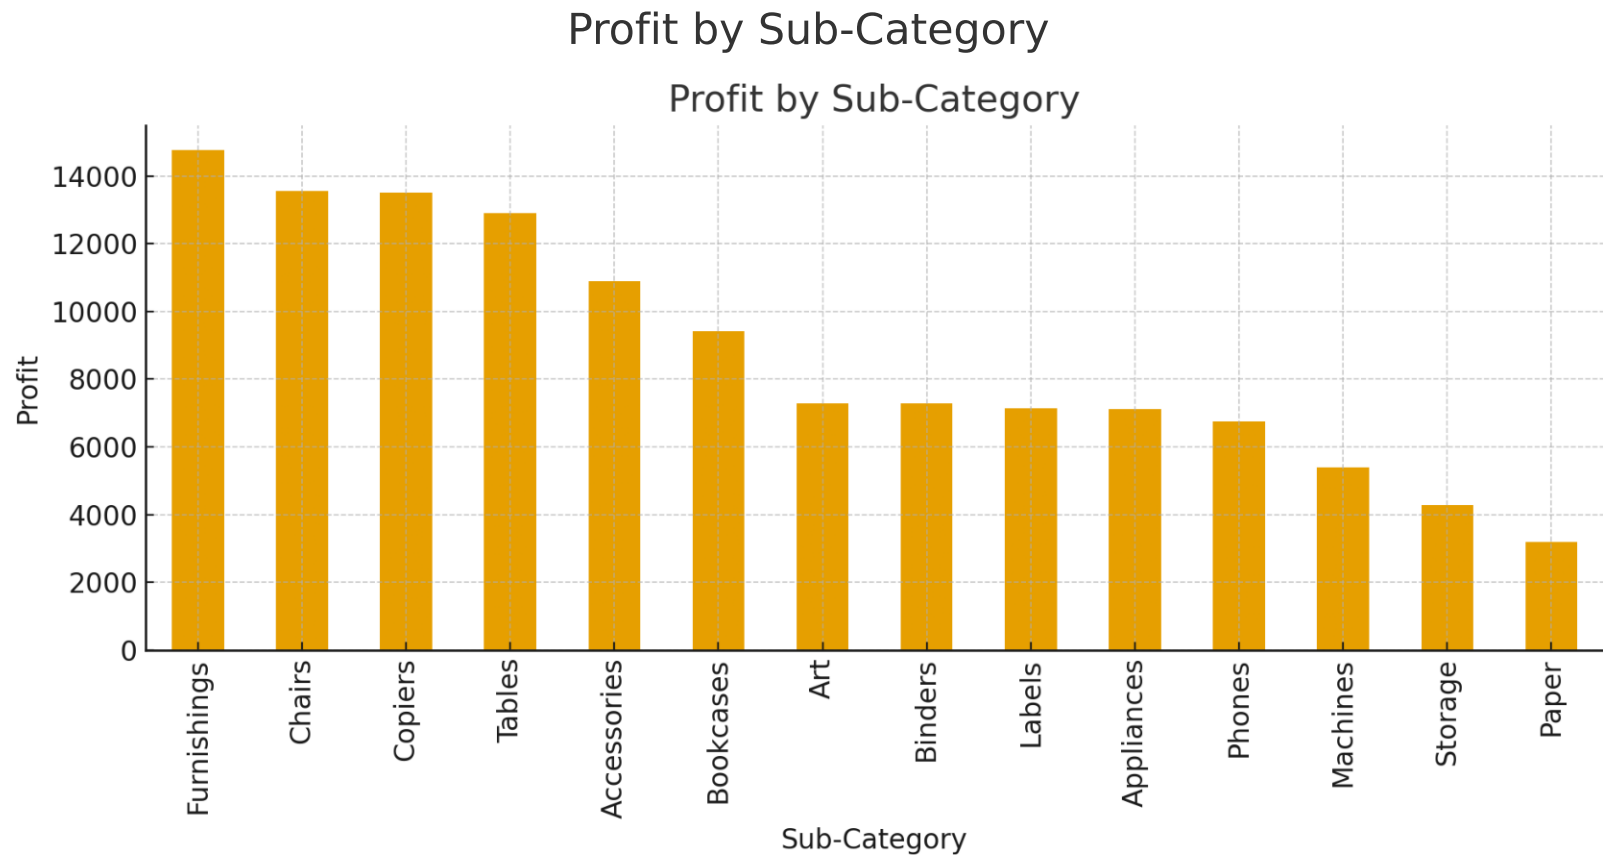

Total Quantity: 6998

Unique Customers: 1225

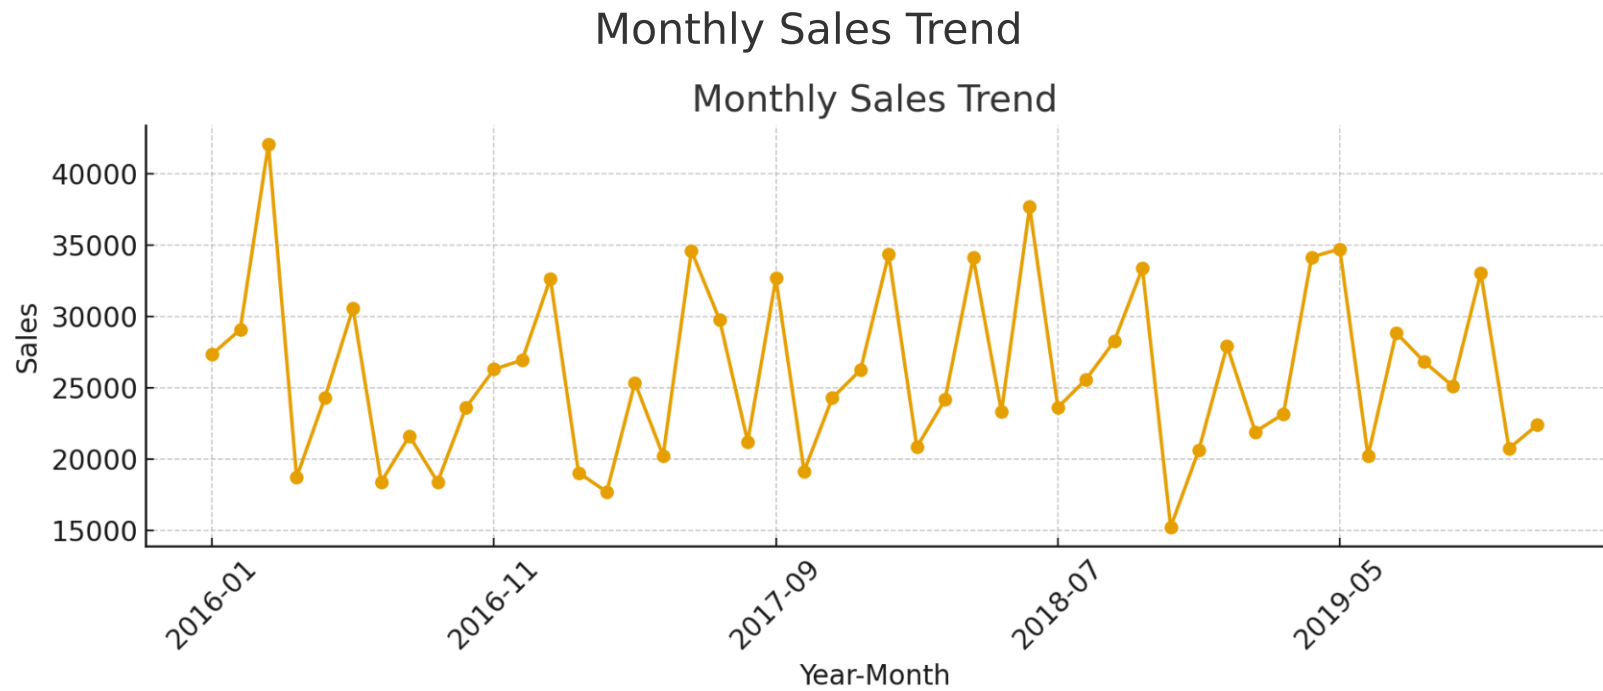

Number of Orders: 1232

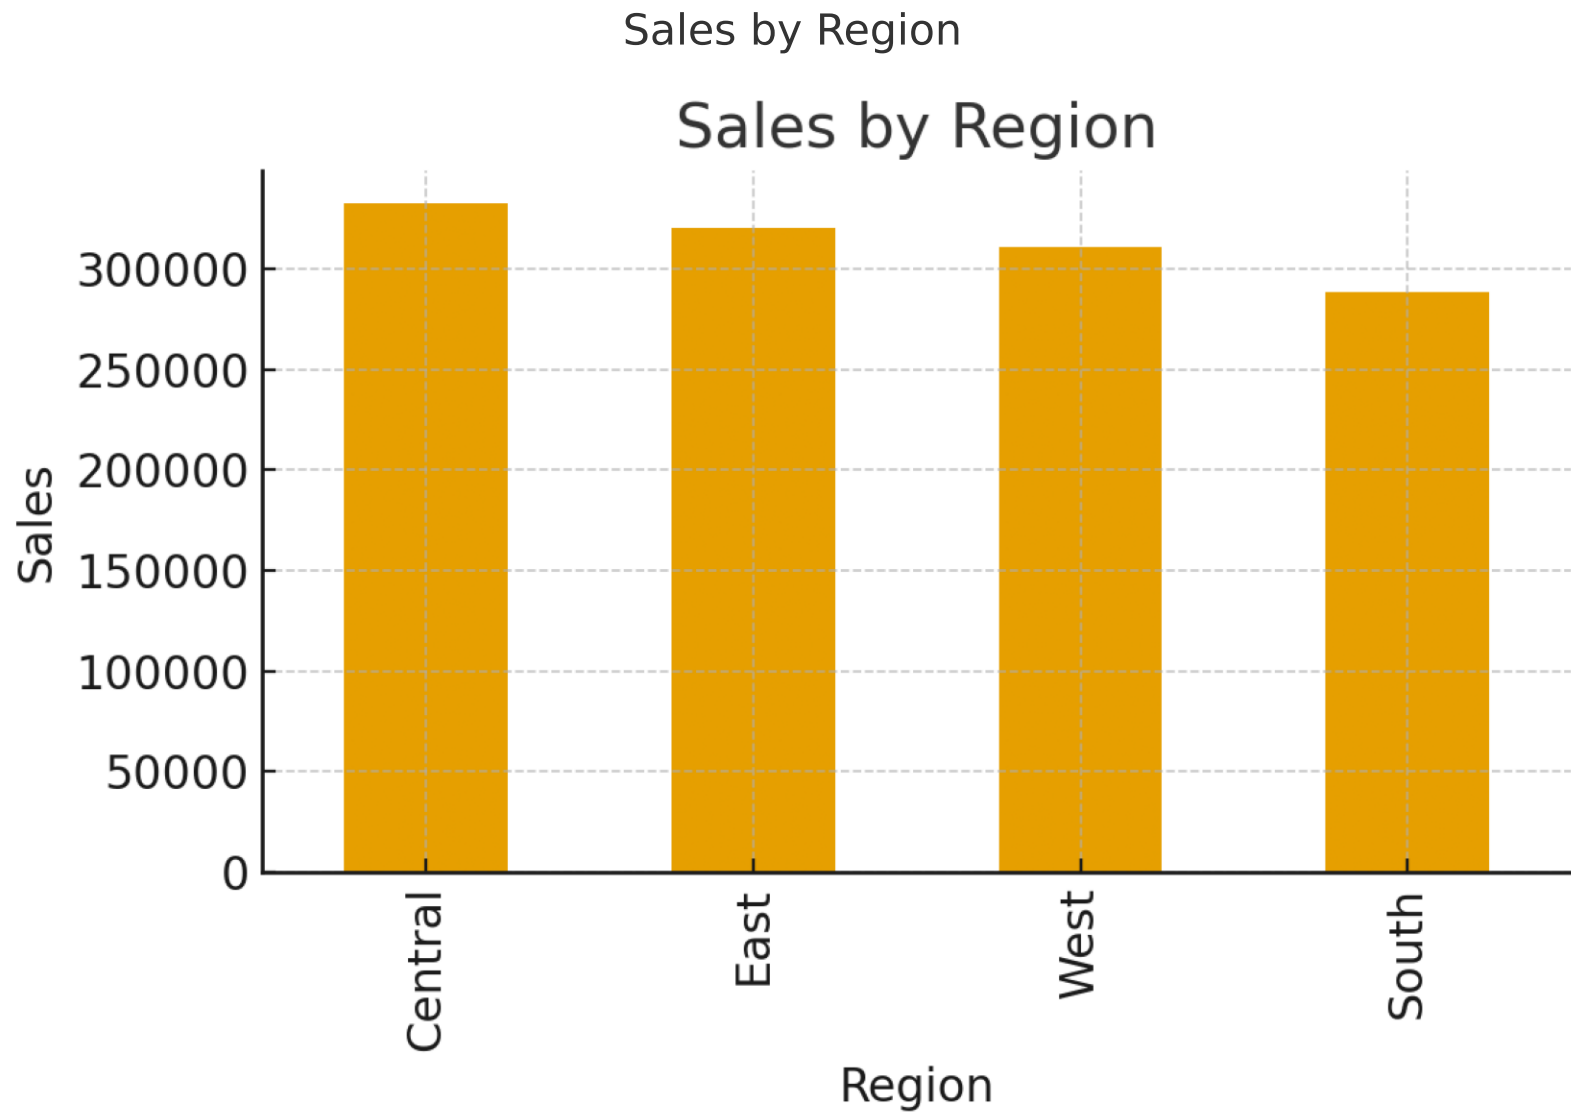

Shows contribution of each product category to total sales. Use to prioritize categories for promotion.

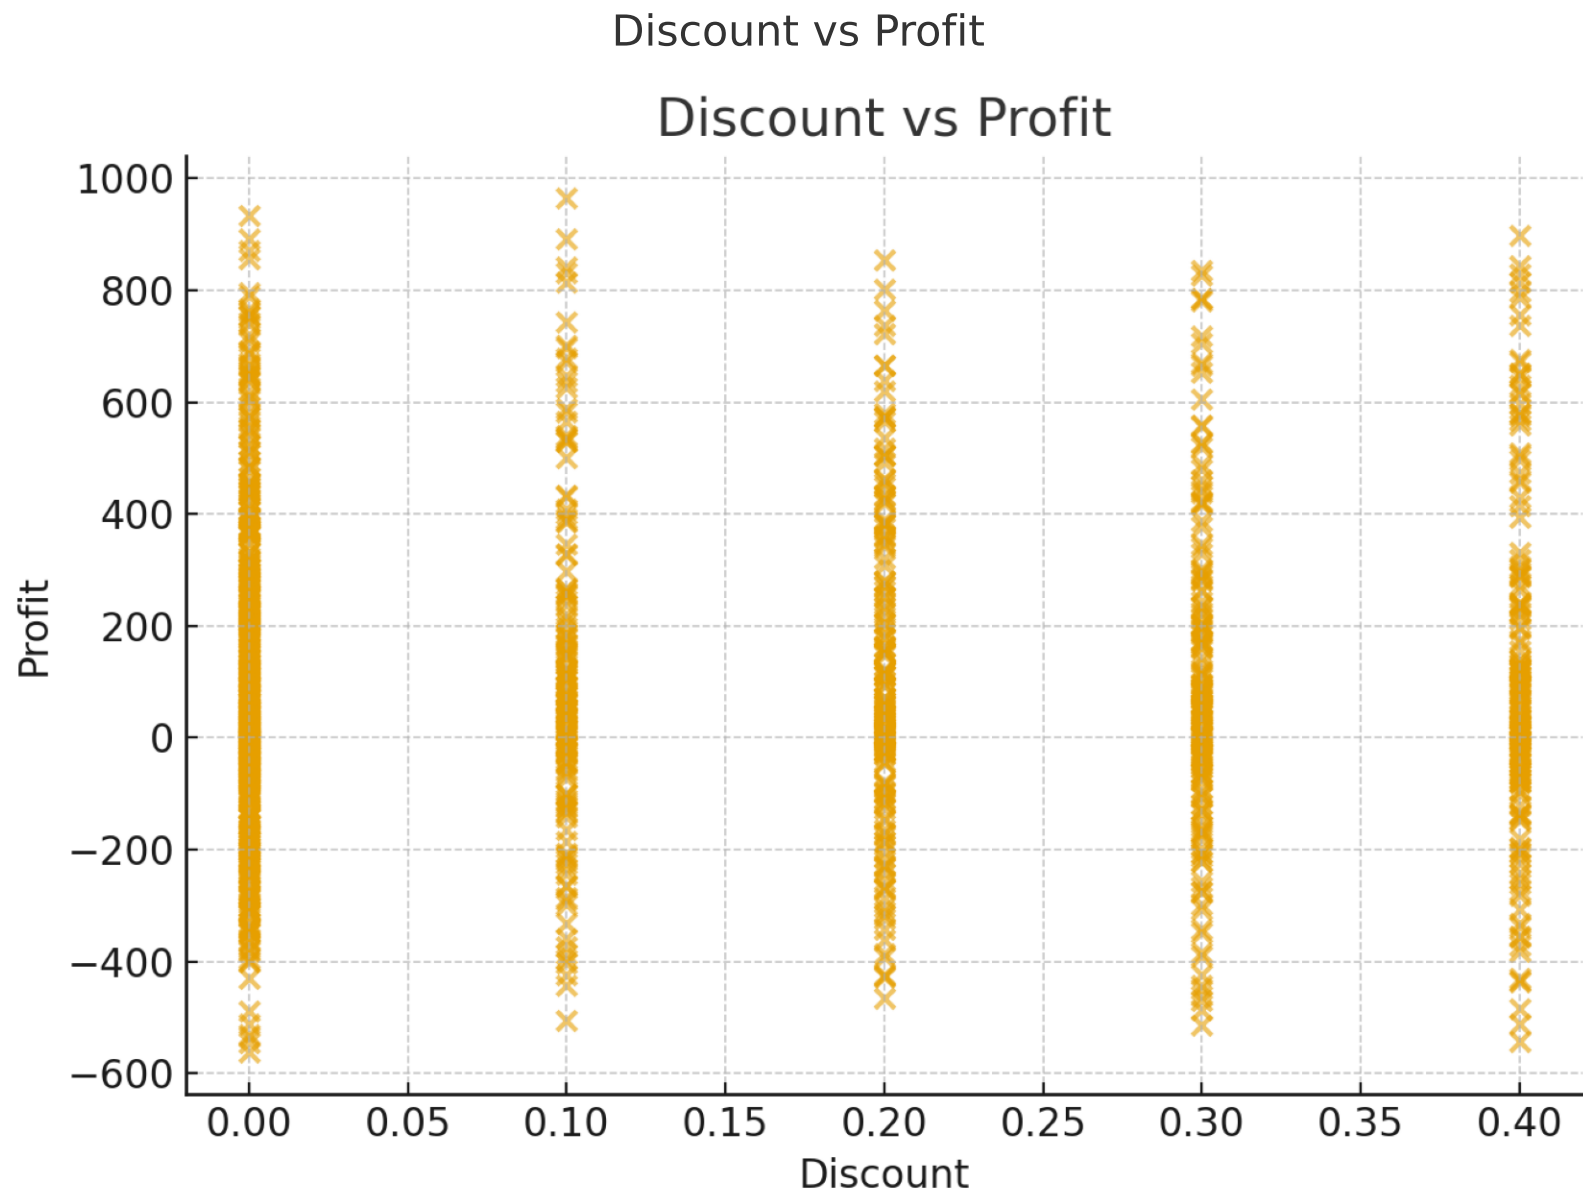

Identifies sub-categories that are most/least profitable. Useful to spot loss-making lines.

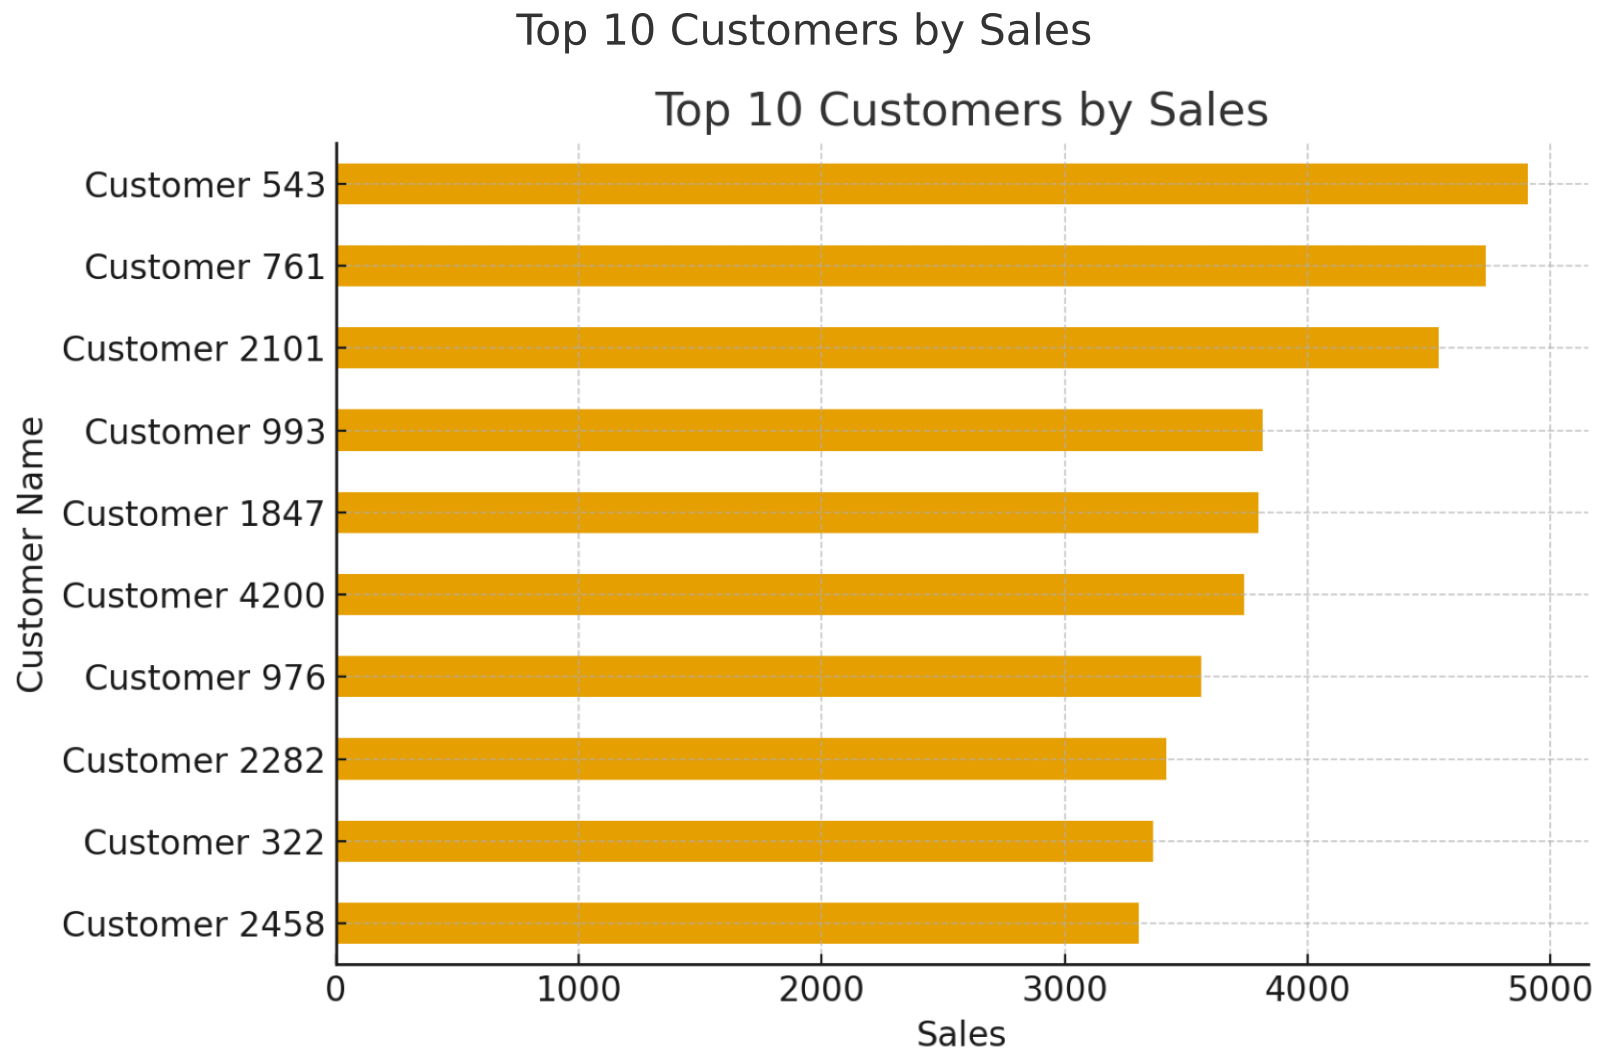

Shows seasonality and growth/decline over time. Good for planning promotions and inventory.

Reveals geographic performance. Target expansion or marketing focus accordingly.

Displays relationship between discounts and profitability. High discounts often correlate with lower profits.

Highlights key customers contributing to revenue; useful for loyalty programs or targeted campaigns.
